TEST1

UXWID

90 MIN 90 POINTS

OVERVIEW

90 MIN 90 POINTS

Build the website shown in
FIG.X from scratch

OVERVIEW

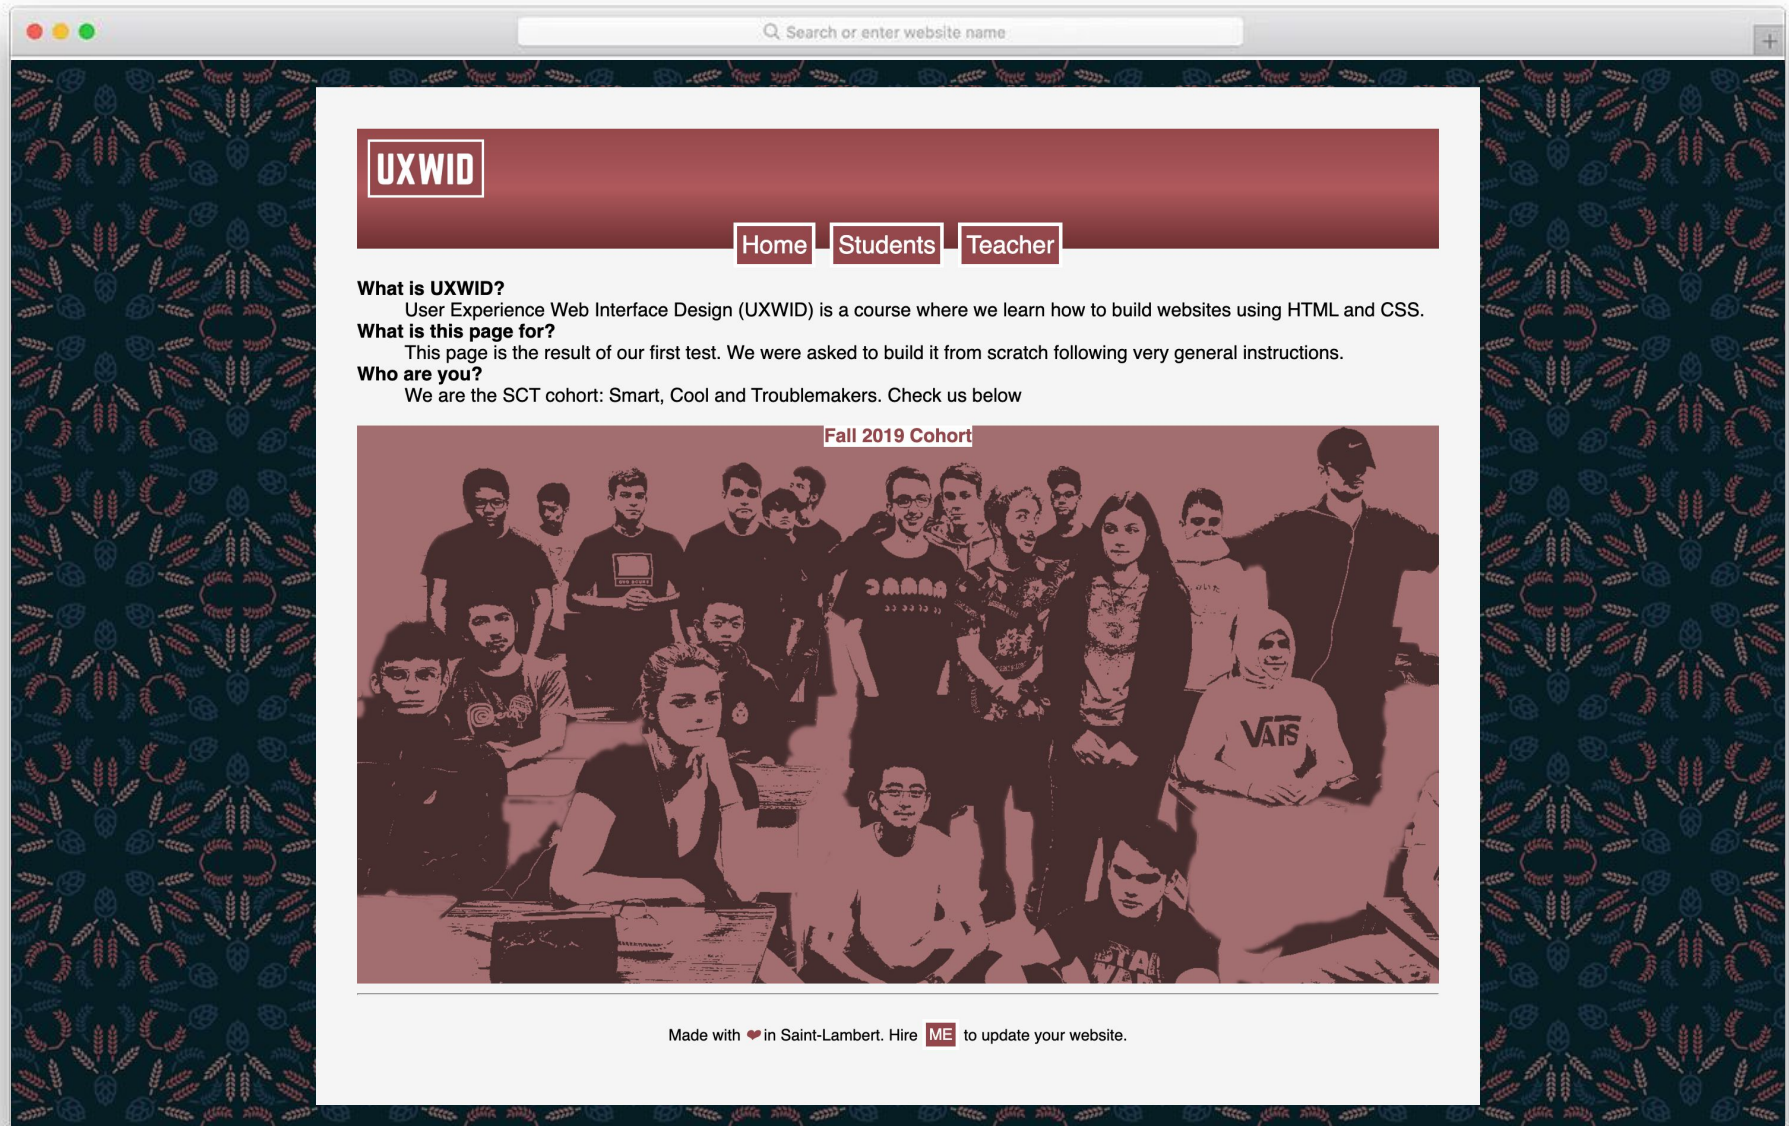

FIG.X

IT'S EASY > Let's Start!

STEP 1 OF 23

19 MIN 19 POINTS

Use HTML tags to implement the wireframe shown in **FIG. 1** in your **index.html**

STEP 1 OF 23

19 MIN 19 POINTS

FIG.1

STEP 2 OF 23

11 MIN 11 POINTS

Place the content provided in **MEM.1** in your **index.html** to obtain the page shown in **FIG.2**

STEP 2 OF 23

11 MIN 11 POINTS

- **UXWID**
- **Home Students Teacher**
- **What is UXWID?**
- User Experience Web Interface Design (UXWID) is a course where we learn how to build websites using HTML and CSS.
- **What is this page for?**
- This page is the result of our first test. We were asked to build it from scratch following general instructions.
- **Who are you?**
- We are the SCT cohort: Smart, Cool and Troublemakers. Check us below
- **Fall 2019 Cohort**
- Made with **❤** in Saint-Lambert. Hire ME to update your website.

MEM. 1

STEP 2 OF 23

11 MIN 11 POINTS

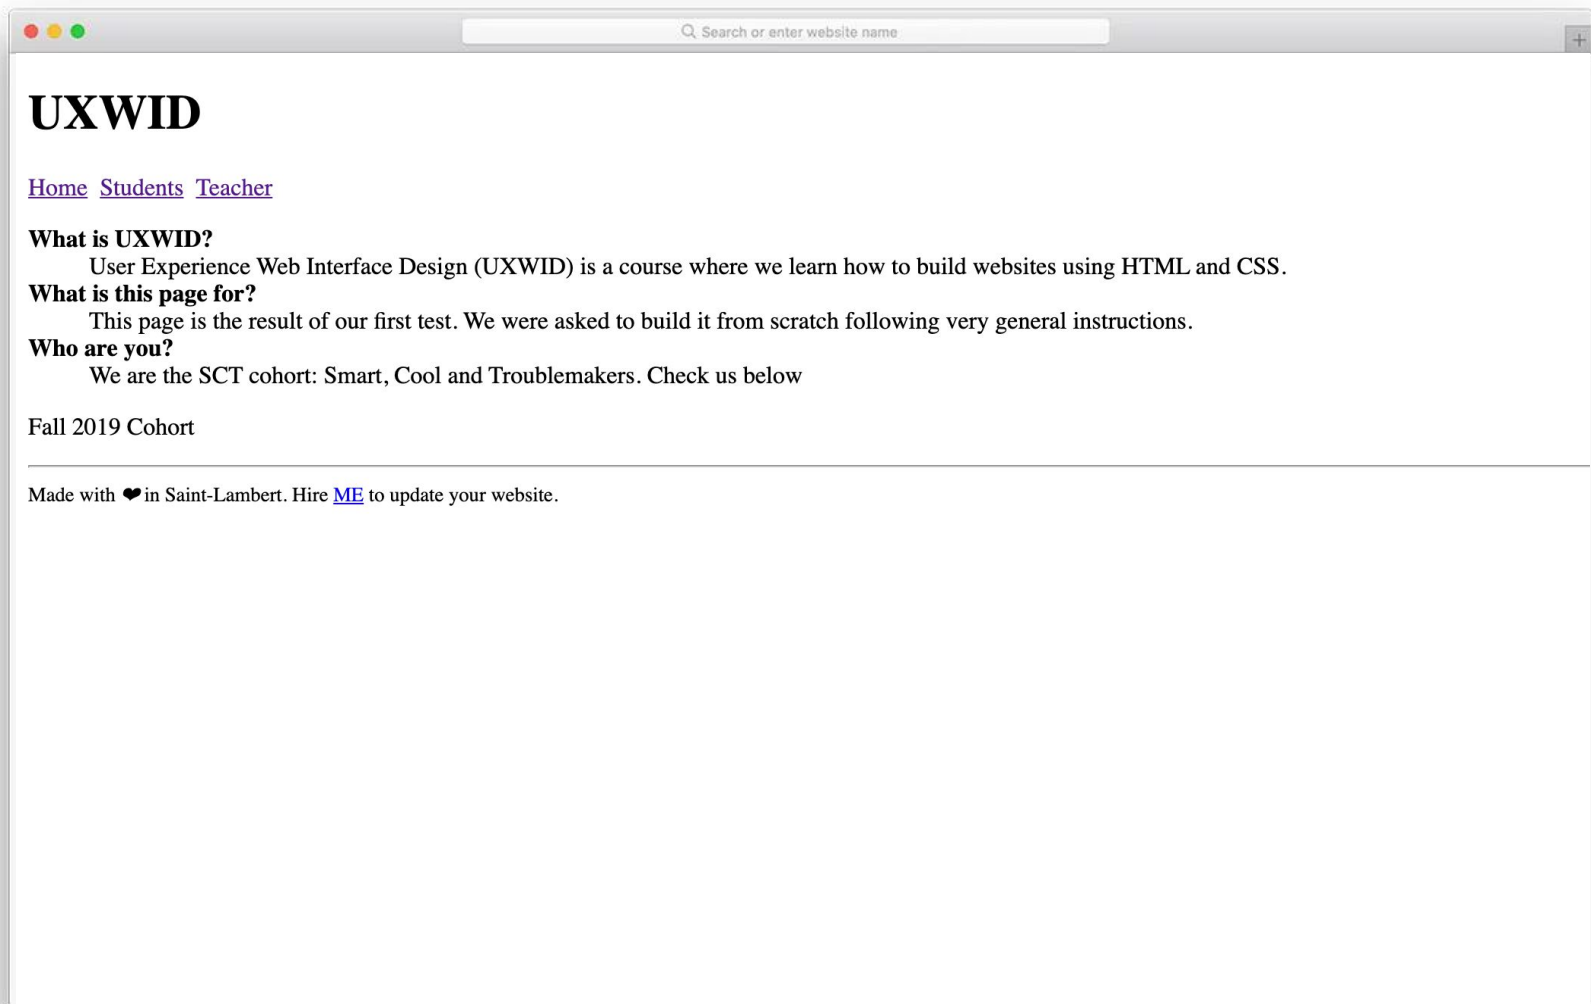

FIG. 2

STEP 3 OF 23

3 MIN 3 POINTS

In your **index.html**, set the language to English, the title of your page to **UXWID** and the set of characters to **utf-8**

STEP 4 OF 23

3 MIN 3 POINTS

In your **index.html**, Add a
favicon.ico

STEP 5 OF 23

3 MIN 3 POINTS

In your `index.html`, link
your `style.css`

STEP 6 OF 23

2 MIN 2 POINTS

In your **style.css**, inside the **body** selector: set the text type to **Helvetica** and the generic type **sans-serif**. Cover the whole body background with the image **pattern.png**

STEP 7 OF 23

2 MIN 2 POINTS

In your `index.html`, add an id `wrapper` to the first `div` and an id `frame` to the second `div`, both shown in **FIG. 1**

STEP 8 OF 23

7 MIN 7 POINTS

In your `style.css`, inside the `wrapper` selector: set its width to occupy `77%` of the screen's width and center it horizontally. Set the spacing all around its content to `3%` and the external top and bottom spacing to `33px`. Set the color of its background to `whitesmoke`.

STEP 9 OF 23

2 MIN 2 POINTS

In your `index.html`, insert a new div inside the div identified by `frame`. Add a class `photo` to the new div.

STEP 10 OF 23

2 MIN 2 POINTS

In your `style.css`, inside the `frame` selector: center its content horizontally and set its vertical dimension to `470px`

STEP 11 OF 23

2 MIN 2 POINTS

In your `index.html`, make sure the text `Fall 2019 Cohort` is a paragraph, of a class `legend`. Place it inside the `div` of the class `photo`

STEP 12 OF 23

4 MIN 4 POINTS

In your **style.css**, inside the **photo** selector: set its vertical and horizontal dimensions to fit **100%** of its parent's dimensions. Use the image **cohort.png** to cover its entire background.

STEP 13 OF 23

5 MIN 5 POINTS

In your `style.css`, inside the `legend` selector: set the text's color to `#95484b`, its thickness to `bold` and `center` it horizontally. Set the color of the background to `white`. Change its `display` property so that the width does not occupy `100%` of its parent's width.

STEP 14 OF 23

3 MIN 3 POINTS

In your `index.html`, replace the text `UXWID` shown in **FIG. 2** by the image `logo.png` and assign a class `logo` to the image element.

STEP 15 OF 23

2 MIN 2 POINTS

In your `style.css`, inside the `logo` selector: set its horizontal dimension to occupy `11%` of its parent's dimension. Set the spacing all around its content to `30px`.

STEP 16 OF 23

2 MIN 2 POINTS

In your `style.css`, inside the **header** selector: set the spacing all around its content to **9px**.

Set the background colors gradually to: **#95484b**, **#af595c**, and **#6f3032** from top to bottom.

STEP 17 OF 23

2 MIN 2 POINTS

In your `index.html`, inside the `nav` element, set the links `Home`, `Students` and `Teacher` to empty. Add two spaces on the left and right of the item `Students`.

STEP 18 OF 23

3 MIN 3 POINTS

In your `style.css`, inside the `nav` selector: set its external top spacing to `-15px`. Center its content and increase its size by 30%.

STEP 19 OF 23

1 MIN 1 POINT

In your **index.html**,
display a line as a
separator between the
main and footer sections.

STEP 20 OF 23

1 MIN 1 POINT

In your `index.html`, add your email to the link `ME` as shown in the bottom of `FIG.X`

STEP 21 OF 23

3 MIN 3 POINTS

In your `style.css`, inside the `footer` selector: set the `top` and `bottom` spacing of its content to `1em`. Center its content horizontally.

STEP 22 OF 23

5 MIN 5 POINTS

In your `style.css`, define a selector for all hyperlinks. Inside the selector: remove the underline, set a continuous **white border** of **3px**, set the color of the background to **#95484b**, the text color to **white**, and set the spacing all around the content to **0.2em**

STEP 23 OF 23

3 MIN 3 POINTS

In your **style.css**, define a selector for a generic HTML element that will contain the content  (**❤**) as seen in the bottom of **FIG.X**. Set its text color to **deeppink**.

</**DONE**>

OVERVIEW

Your page should look similar to **FIG.X** – if not, then read the instructions again and update your **index.html** or your **style.css** until you get the expected result.
